

WHY JOIN BAND?

-Playing an instrument is *fun* and once you learn you can play for the rest of your life!

-Many other elective classes can be taken through Parks and Rec., but *you can only do band at school* and if you don't play in 6th grade it's much harder to join in 7th or 8th

-*Make new friends!* Students in band get to do so many fun things together that they become really good friends

-Research shows that students involved in music do better in school and are more likely to go to *college* than those who have not actively participated in music for multiple years.

-If you stick with band you get to take *cool trips* and go to *contests and competitions* with your band friends.

-Students can apply for band *scholarships* in college (even if they major in something else).
